TENTANG SAYA

Saya adalah seorang Web Developer dengan pengalaman sejak 2019 dalam membangun dan mengelola aplikasi web secara end-to-end, mulai dari frontend, backend, database, API, hingga deployment dan server management. Berpengalaman mengembangkan website pemerintahan, dashboard administrasi, sistem berbasis database, serta aplikasi berbasis Web3 dan blockchain. Terbiasa menggunakan Laravel, Node.js, React.js, Next.js, TypeScript, MySQL, dan Linux/VPS, serta memiliki pengalaman dalam optimasi performa, SEO, keamanan aplikasi, dan maintenance sistem production.

PENGALAMAN KERJA

DevOps Developer - Noor Sistem Aplikasi

Mei 2026 - Sekarang

- Meningkatkan SEO dan performa website Fullstack Tanah Laut (tanahlaut.mahadesa.com) dari skor sekitar 60 menjadi 80+, melalui optimasi struktur website, performa halaman, dan teknis SEO.
- Mengembangkan dan mengelola website Fullstack Tanah Laut, mencakup frontend, backend, database, API, dan fitur sistem.
- Melakukan monitoring dan pengamanan sistem untuk mencegah serta menangani potensi serangan siber dan akses tidak sah.
- Melakukan maintenance, troubleshooting, dan bug fixing untuk menjaga stabilitas dan performa aplikasi.
- Mengelola database dan integrasi API untuk memastikan pertukaran data antar sistem berjalan optimal.
- Melakukan deployment dan konfigurasi aplikasi pada VPS/Linux server, termasuk Nginx, domain, SSL, dan layanan pendukung.
- Mengembangkan serta mengoptimalkan fitur berdasarkan kebutuhan pengguna dan kebutuhan proyek.

Web Developer - Freelance

Maret 2020 - Sekarang

- Web3 Developer - Mengembangkan aplikasi berbasis blockchain dan privasi bernama [nuxor.xyz](#), tempat anda menyimpan file, yang dienkripsi dan key hanya anda yang tahu.
- Backend Engineer - Membangun Website Komunitas Makan Bergizi Gratis Martapura Timur [hhmbgintip.art](#)
- DevOps Engineer - Mengelola deployment aplikasi, VPS/Linux server, Nginx, domain, SSL, monitoring, dan konfigurasi production environment pada Seluruh website yang saya buat.
- Frontend Developer - Mengembangkan website, dashboard administrasi, dan antarmuka responsif menggunakan React.js, Next.js, Tailwind CSS, dan Bootstrap.
- Full-Stack Developer - Membangun aplikasi web secara end-to-end mulai dari frontend, backend, database, API, authentication, hingga deployment dan maintenance sistem.

SUMMARY

I am a Web Developer with experience since 2019, specializing in building and managing end-to-end web applications, from frontend and backend development to databases, APIs, deployment, and server management. Experienced in developing government websites, administrative dashboards, database-driven systems, and Web3/blockchain applications. Proficient in Laravel, Node.js, React.js, Next.js, TypeScript, MySQL, and Linux/VPS, with hands-on experience in performance optimization, SEO, application security, and production system maintenance.

WORK EXPERIENCE

DevOps Developer - Noor Sistem Aplikasi

May 2026 - Now

- Improved the SEO and performance score of the Tanah Laut Full-Stack Website (tanahlaut.mahadesa.com) from approximately 60 to 80+, through website optimization, technical SEO improvements, and performance enhancements.
- Developed and managed the Tanah Laut Full-Stack Website, covering frontend, backend, database, APIs, and system features.
- Conducted system monitoring and security management to prevent and respond to potential cyberattacks and unauthorized access.
- Performed system maintenance, troubleshooting, and bug fixing to maintain application stability and performance.
- Managed databases and API integrations to ensure efficient and reliable data exchange between systems.
- Handled application deployment and VPS/Linux server configuration, including Nginx, domains, SSL, and supporting services.
- Developed and optimized new features and system improvements based on user requirements and project needs.

Web Developer - Freelance

March 2020 - Now

- Web3 Developer - Developed [Nuxor.xyz](https://nuxor.xyz), a blockchain-based privacy-focused file storage platform where files are encrypted and access keys remain exclusively under the user's control.
- Backend Engineer - Developed and managed the backend system for the Gratis Community Meal Program in East Martapura at hhmbgintip.art, including API, database, authentication, and system functionality.
- DevOps Engineer - Managed application deployment, VPS/Linux servers, Nginx, domains, SSL certificates, monitoring, and production environments across multiple web projects.
- Frontend Developer - Developed websites, administrative dashboards, and responsive user interfaces using React.js, Next.js, Tailwind CSS, and Bootstrap.
- Full-Stack Developer - Built end-to-end web applications, covering frontend, backend, database, API integration, authentication, deployment, security, and system maintenance.

Alfa Sinergia – Field Supervision Intern

October 2024 - March 2025

- Supervised the performance of construction workers to ensure work was carried out according to project requirements.
- Monitored the availability of construction materials on-site to ensure smooth project operations.

EDUCATION

MIN 16 BANJAR

2013 - 2019
